PROFILE

Computer Science graduate (SPPU) and ISC2 Certified in Cybersecurity (CC) pursuing a career in penetration testing and ethical hacking. Ranked in the top 1% globally on TryHackMe, with hands-on experience in web application security assessments, network reconnaissance, and vulnerability identification & validation using Burp Suite, Nmap, and Linux. Strong grasp of networking, web technologies, authentication, and APIs, built through an offensive security internship and self-directed CTF practice on TryHackMe, Hack The Box, and PortSwigger Web Security Academy. Also builds original security tooling end-to-end — from an ESP32-based wireless attack platform to a full social media app hardened against common web vulnerabilities. Strong analytical, problem-solving, and written communication skills.

TECHNICAL SKILLS

- **Security:** OWASP Top 10, web application security assessments, vulnerability identification & validation, authentication & API security, BLE/Wi-Fi attacks (deauth, flood, spoofing), secure coding practices (anti-XSS, anti-SQLi, anti-IDOR, rate limiting, file validation)
- **Tools:** Burp Suite, Nmap, Wireshark, Kali Linux, Ubuntu/Linux CLI, UFW firewall configuration, Git/GitHub
- **Networking:** TCP/IP fundamentals, web technologies, network reconnaissance and scanning, traffic analysis
- **Programming:** HTML, CSS, JavaScript, Node.js, embedded C/C++ (ESP32/Arduino)
- **Reporting:** Vulnerability documentation, remediation recommendations, technical report writing; strong analytical/problem-solving skills and written communication in English

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC) — July 2026
- Cisco Introduction to Cybersecurity — August 2026

PRACTICAL EXPERIENCE — HANDS-ON SECURITY PLATFORMS

- Ranked in the top 1% of users globally on TryHackMe; completed the SEC0 and SEC1 learning paths and the OWASP Top 10 module, plus numerous CTF rooms and challenges
- Currently progressing through the PT1 (Penetration Tester) path and CompTIA PenTest+-aligned content
- Hands-on practice on Hack The Box and PortSwigger Web Security Academy
- Completed OverTheWire Bandit (Linux/command-line fundamentals) and OWASP Juice Shop (hands-on web application exploitation)

PROFESSIONAL EXPERIENCE

Offensive Security Intern — Carbonbery Technology Pvt. Ltd.

Jan 2026 – 31 Mar 2026

- Performed vulnerability scanning and target reconnaissance using Nmap and Burp Suite
- Assisted in identifying and validating web application vulnerabilities under senior guidance
- Researched attack techniques and security concepts to support ongoing testing engagements
- Documented findings and contributed to technical reporting

Web Development Intern — A2Z IT Hub Pvt. Ltd.

Jul 2025 – 10 Sep 2025

- Developed and deployed a website using HTML, CSS, and JavaScript as part of a JavaScript certification project

FEATURED PROJECTS

Project V01D — ESP32-based Flipper Zero-style multi-tool github.com/5H4RV1L/project_V01D

- Built a portable wireless security testing device on ESP32 with BLE spoofing, MAC spoofing, Wi-Fi deauthentication and flood attacks, and universal IR remote control, among other RF/wireless features

Synapse — Full-stack social media platform github.com/5H4RV1L/synapse

- Built core social features: live chat rooms, posts with replies, upvote/downvote, friend requests, live notifications, registration, login, and password reset
- Implemented security controls including rate limiting, password strength rules, anti-XSS and anti-SQL injection protections, file upload validation, and anti-IDOR safeguards

Shellscape — Retro-terminal Linux & cybersecurity learning platform shellscape.sharvil.site

- Designed a browser-based, retro terminal-themed platform for learning Linux and cybersecurity fundamentals across multiple domains, with CTF-style challenges
- **Other Projects:** VIL Coin (a simple blockchain with mining, transactions, and a P2P ledger), an ESP32-cam FPV drone, a Bluetooth-controlled river-cleaning robot (final year project), and this personal portfolio site.

EDUCATION & ACHIEVEMENTS

Savitribai Phule Pune University (SPPU)

2023 – 2026

B.Sc. Computer Science • Grade: A • CGPA: 7.08 • Languages: English, Hindi, Marathi

NASA Space Apps Challenge — 48-hour international hackathon, participant (4–5 Oct 2025)
